

# Dynasign Voice App Service

Alexa is Amazon's cloud-based voice service available on tens of millions of devices from Amazon and third-party device manufacturers.

Twenty years ago, businesses started to build websites to interact with customers via Web browsers. Today, with Alexa, you can build Alexa Skills that enable your customers to interact with you in a more personalized way with voice.

Dynasign can help you build, setup and manage your custom Alexa Skills. We also develop Alexa Skills to work with your digital signs.

## How Dynasign Voice App Service Works with Amazon Alexa?
